River Mountains Water Treatment Facility

RE: Clearwell Repair

Mr. Clink,

It is not often we stop to say thank you for a job well done. But I wanted to express our thanks for the performance of your crews and specifically your field superintendent, Dale Patterson. I am convinced that the success of this project is related to Dale's personal conviction to get this large and growing project, \$1.1M, done while meeting all the ever changing requirements set by SNWA. I know that Dale and his crews were able to succeed due to the up front effort Mark LeMay. I appreciate the time and effort it took to both of them to develop an acceptable repair plan for SNWA so this work could proceed.

I again say thank you for a job well done. LMC looks forward to working with Truesdell and these individuals again in the future.

Very Truly Yours,
LAKE MEAD CONSTRUCTORS

Paul F. Brich
Project Engineer
